CONDUCTOR BAR SYSTEM

Magnetek knows the safety and performance of your overhead material handling system are top priorities. That's why we proudly offer the Electromotive Systems Electrobar FS Conductor Bar System for the electrification of cranes, monorails and automated storage and retrieval systems.

UNIQUE CONDUCTOR BAR SHAPE ENHANCES PERFORMANCE

- Contoured bar design ensures electrical contact between the collector shoe and conductor bar.
- Wear to the conductor bar cover is minimized.
- Potential loss of electrical contact at the joints is significantly reduced.
- Rigid conductor bar design minimizes deflection between hangers.

EASY TO INSTALL AND MAINTAIN

- Modular, snap-in multi-pole conductor bar hangers reduce installation and maintenance time.
- Compression-type anchors eliminate the need for field drilling.
- Expansion line elements come completely pre-assembled.
- Minimal system maintenance required—just periodically replace collector brush assemblies.
- Snap-in collector shoe assembly.

VALUE-PACKED SYSTEM

- Systems up to 490 feet in length can be installed without expansion assemblies.
- Standard 15' bar lengths mean fewer joints to purchase. (Custom lengths available by request).
- Common hangers and joint assemblies allow for reduced inventory levels.
- System design reduces installation labor costs.

DESIGNED WITH SAFETY IN MIND

- cUL Listed, finger safe design minimizes potential for electrical contact.
- Grounding conductor bar available with green cover for ease of identification.

AVAILABLE IN A VARIETY OF CONFIGURATIONS

- Single and double shoe collector assemblies.
- 90, 110, 125*, 250 and 400 Amp ratings.
- Snap-in hanger kits available for 2, 3 and 4 pole applications.
- Single hangers also available for special configurations.
- Single or tandem pantograph style collectors.
- Can be used in horizontal or vertical mounted applications.

* Suitable for 125 Amp configurations in non-cUL applications.

LINE ELEMENTS

Our standard Electrobar FS Conductor Bar comes in 15' lengths, so there are fewer joints to purchase and installation time is reduced! Systems may be installed up to 490' without expansion assemblies, and in operating environments up to 160 degrees Fahrenheit. We include a green PVC conductor bar cover to provide electrical protection and easy identification of the grounding conductor.

Note: It is permissible to use the smallest rated bar as the ground.
Example: 90, 110, 125 Amp Electrobar FS System - use the 90 Amp FS Bar as the ground.

COLLECTOR ASSEMBLIES

Collector assemblies are designed to travel at speeds up to 900 ft. per minute using standardized components. They provide constant spring force throughout the entire stroke due to the parallelogram effect between the arm and the spring. Electrobar FS collectors feature a snap-in shoe assembly—simply make the electrical connection and snap the shoe into place. Our graphite impregnated copper contact shoes are designed for long life and minimal drag. Standard Electrobar FS collectors have a 100 and 200 Amperes continuous current rating. Single or tandem collector shoe assemblies are available.
